Bandar Lampung, Lampung

Muhammad Rafi Satria is a Bachelor of Computer Science graduate from the University of Lampung with experience in full-stack web development, as well as network, CCTV, software, and hardware troubleshooting. He is passionate about software development, especially web development, and is eager to apply his technical skills to build innovative digital solutions. Rafi is a fast learner, adapts quickly to new environments, and works effectively both independently and as part of a team.

EDUCATION

University of Lampung — **Bandar Lampung, Lampung**
Bachelor Degree in Computer Science | GPA: 3.72/4.00 — Aug 2021 – June 2025

PROFESSIONAL EXPERIENCES

Ide Diconic Indonesia — **Ciamis, Jawa Barat**
DevOps | Internship — Aug 2026 – Oct 2026

- Managed and maintained server infrastructure as a DevOps Engineer to ensure system stability, availability, and reliable application operations.
- Provisioned and configured new servers for clients, including environment setup, deployment preparation, and server configuration based on project requirements.
- Performed server monitoring, troubleshooting, and maintenance to identify and resolve infrastructure and application-related issues.
- Supported the development and customization of Moodle-based systems through minor coding, configuration, and feature adjustments based on client requirements.
- Assisted with application deployment and server configuration to ensure applications were properly integrated and accessible in production environments.
- Prepared technical and operational reports covering server activities, system status, maintenance, and project progress for documentation and reporting purposes.

Kosasih Medika Lampung — **Bandar Lampung, Lampung**
Fullstack Developer | Internship — Dec 2025 – May 2026

- Developed internal web-based systems to support the operations of 10 clinic branches using JavaScript, React, Bootstrap, Tailwind CSS, Appsmith, Baserow, MySQL, and n8n.
- Built the Satu Sehat Integration Dashboard using JavaScript, Appsmith and Baserow to monitor healthcare data integration, submission status, and support digital healthcare services.
- Developed a Commission Calculator System using Appsmith, Baserow, and JavaScript to automate employee incentive calculations and streamline commission reporting.
- Created a Loyal Patient Dashboard using Appsmith, Baserow, and JavaScript to monitor patient visits and provide insights for marketing strategies and patient retention.
- Built an Online Reservation System using Appsmith, Baserow, JavaScript, and n8n to simplify patient registration, automate workflows, and improve clinic administrative efficiency.
- Developed a web-based Online Attendance System using React.js, Tailwind CSS, JavaScript, and MySQL to streamline employee attendance recording and provide real-time attendance monitoring.
- Performed troubleshooting and maintenance for network infrastructure, CCTV systems, software, and hardware to ensure reliable system operations.

Bangkit led by Google, Goto, and Traveloka — **Central Jakarta, Jakarta**
Cloud Computing & Backend Trainee | Contract — Feb 2024 – Jul 2024

- Completed the Cloud Computing learning path in Bangkit Academy, gaining hands-on experience with Google Cloud Platform and cloud-native application development.
- Developed the backend of the DermaOne Capstone Project using Express.js by designing RESTful APIs and integrating the machine learning prediction service.

- Deployed the machine learning model on Google Cloud Run, managed application data with Google Cloud SQL, and deployed the Express.js backend on a Google Compute Engine VM Instance.
- Collaborated with Machine Learning and Mobile Development teams to deliver DermaOne, an application that supports early skin disease detection through image-based analysis.

FMIPA University of Lampung **Bandar Lampung, Lampung**
Assistant Lecturer | Contract Feb 2024 – Jul 2024

- Assisted the lecturer in delivering Web Programming (PHP) course materials and practical sessions.
- Guided students during coding exercises and provided technical support in web development.
- Prepared and managed teaching materials to support classroom activities.
- Evaluated student assignments and final web-based projects, providing constructive feedback to improve learning outcomes.

Badan Pengelola Keuangan dan Aset Daerah Provinsi Lampung **Bandar Lampung, Lampung**
Fullstack Developer | Internship Dec 2023 – Feb 2024

- Assisted in entering regional government expenditure data using the SIPPKD application.
- Developed SIDAK (Physical Special Allocation Fund Information System), a web-based system for managing and monitoring Physical Special Allocation Fund (DAK) data using PHP.
- Maintained and enhanced the system to ensure reliable performance and accurate data management.

ORGANIZATION

Himpunan Mahasiswa Ilmu Komputer Universitas Lampung (HIMAKOM UNILA)
Staff of Scientific Division Feb 2022 – Dec 2022

- Organized academic training sessions and workshops to prepare participants for competitions and enhance their technical knowledge.
- Served as the Event Coordinator for a Job Interview Workshop, managing event planning, coordinating speakers, and ensuring successful event execution.
- Coordinated project exhibition events to showcase software projects developed by Computer Science students.
- Collaborated with committee members to plan and execute academic events while improving participant engagement and event quality.

SKILL

Language: Indonesian (Fluent), English (Intermediate, TOEFL: 523)

Software & Tools: VS Code, GitHub, Postman, ChatGPT, Claude AI, Figma, n8n, Appsmith, Baserow, Microsoft Office

Technical Skills: JavaScript, React.js, Node.js, Express.js, Next.js, PHP, Laravel, CodeIgniter 4, MySQL, Tailwind CSS, Bootstrap, HTML, CSS, C++

Soft Skills: Teamwork, Time Management, Public Speaking, Leadership, Problem Solving
